

## ABSTRACT

A jelly food containing soybean protein that even when  
a soybean protein is contained, realizes high storage  
5 stability, exhibits low probability of deposition at a weak  
acid zone and ensures excellent flavor. In particular,  
jelly food wherein use is made of low phytic acid soybean  
7S-protein. More particularly, a jelly food containing  
soybean 7S-protein wherein the phytic acid content is 0.2%  
10 or less, preferably 0.1% or less, per protein.
